EDUCATION

B.Tech – Computer Science & Engineering (Data Science) | Manipal University Jaipur Oct 2024 – Present · Jaipur, Rajasthan

CGPA: 8.98 / 10 (after 3 semesters)

★ Dean's Academic Excellence Award - Semester 2 & 3

- ▶ Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Cloud Computing, Database Management Systems, Data Mining, Machine Learning

TECHNICAL SKILLS

Languages	Python, Java, SQL
ML / Data	Scikit-learn, Pandas, NumPy, Machine Learning, Data Analytics, Data Visualization, Data Mining
Web / APIs	FastAPI, REST APIs, JSON, Flask
CS Core	DSA, OOP, Computer Networks, Cloud Computing, Distributed Systems (basics)
Tools	Git, GitHub, Jupyter Notebook, VS Code

ACHIEVEMENTS & AWARDS

- ▶ Smart India Hackathon (SIH) - College Winner | Built *Kridāksha*, a gamified learning platform designed for rural education access - developed end-to-end by a 6-member team
- ▶ Dean's Academic Excellence Award - Awarded in 2 consecutive semesters (Sem 2 & Sem 3) for maintaining top academic standing
- ▶ Google - The Big Code: Ranked in Top 1,500 nationally out of thousands of participants

PROJECTS

Yosvata - OSS Health Predictor | Python · FastAPI · React · XGBoost · GitHub API *Personal*

- ▶ Building an end-to-end tool that classifies GitHub repositories as Active, Maintenance, or Dormant by analyzing repository signals - targeting the problem of evaluating OSS project viability before contributing or depending on it.
- ▶ Engineered 24 features across commit cadence, issue resolution rate, contributor diversity, and release frequency; trained an XGBoost classifier served via a FastAPI REST backend with a React dashboard.
- ▶ Achieved 83% classification accuracy on 312 labeled repositories; REST API returns predictions in under 180ms average response time.

RESEARCH (ONGOING)

Bias-Aware AI Pipelines with Fairness Detection | Manipal University Jaipur *Advisor: Dr. Chirag Joshi*

- ▶ **Problem statement:** studying bias detection and mitigation in the domain of **machine learning**, specifically analyzing fairness issues in credit risk prediction using the German Credit dataset.
- ▶ **Methodology and current stage** - implemented a bias-aware ML pipeline including feature legitimacy tests, bias scoring, and mitigation techniques (splitting, reweighting); experimentation and evaluation complete with performance comparison (before vs after mitigation).

CERTIFICATIONS

Exploratory Data Analysis for Machine Learning - IBM / Coursera
The Nuts and Bolts of Machine Learning - Google / Coursera
